EDUCATION

BMS Institute of Technology and Management (BMSIT&M) <i>Bachelor of Engineering in Computer Science</i> Relevant Coursework: Data Structures & Algorithms, Computer Networks, Operating Systems, Database Management Systems	Bangalore, India <i>Expected 2029</i>
Arniko Awasiya Secondary School <i>Class 12th (NEB)</i>	Biratnagar, Nepal <i>2022 – 2024</i>

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C, Java
Backend & Databases: Node.js, Express, MongoDB, Mongoose, Redis, PostgreSQL, Prisma
Frontend: React, Next.js
Tools & Platforms: Git, GitHub, REST APIs, JWT/OAuth, Linux
CS Fundamentals: Data Structures & Algorithms, Operating System, OOPS

EXPERIENCE

Software Engineering Intern <i>Earthling Aid Tech Pvt. Ltd.</i> - Collaborated on Deepak Inventory, a Windows desktop inventory management app (Python, Tkinter) for tracking sales, purchases, party ledgers, and live stock, with Excel-based data storage - Contributed to NextTour, an AI-powered travel planning platform built as a monorepo (Next.js, Express, PostgreSQL/Prisma, Redis/BullMQ), integrating live transport, hotel, and weather data providers with an AI-generated itinerary pipeline - Contributed to MedConsul, a NEET counseling web app (React/Vite, Express, MongoDB) covering closing-rank analytics, fee comparisons, and college reviews across 900+ colleges - Built Sri Vinayaka Consultancy, an 18-page educational counseling website (HTML/CSS/JavaScript) with an Express + MongoDB backend for lead capture, deployed on Vercel	Bengaluru, India <i>Jun 2026 – Sept 2026</i>
--	---

PROJECTS

E-Commerce Backend Platform <i>Node.js, Express, MongoDB, Redis, React/Next.js</i> - Designed and built a full-featured e-commerce backend using Node.js, Express, and MongoDB, modeling core domain entities (User, Product, Cart, Order, Coupon) with Mongoose - Implemented a complete JWT-based authentication system, including secure session handling and role-based access control - Integrated Redis for token blacklisting, API rate limiting, and OTP management, improving security and abuse resistance - Connected a React/Next.js frontend to backend APIs; scoped a planned migration from MongoDB/Mongoose to PostgreSQL with Prisma and TypeScript for stronger type safety
Indian Sign Language (ISL) Detection System <i>Python, MediaPipe, OpenCV</i> BMSIT&M Academic Project - Built a real-time hand tracking pipeline using MediaPipe to detect and localize hand landmarks from live video input - Developed a gesture detection script with region-of-interest (ROI) expansion and temporal smoothing to improve recognition stability - Engineered a grayscale normalization pipeline to improve model robustness across varied lighting conditions - Produced full academic documentation, including a technical report and presentation decks, for departmental project reviews

ACHIEVEMENTS

Code Red 3.0 – National-Level 24-Hour Hackathon, Grand Finale Selected for and participated in the Grand Finale of Code Red 3.0, a national-level 24-hour hackathon organized by E-Cell, BMSIT&M	Dec 2025
